The DigiTrans project aims to network rural stakeholders from different European regions on a collaborative online-platform in order co-design, co-develop and co-implement digital innovation within a previously developed Smart Region Framework.

The DigiTrans Hub is intended to convert into a European open exchange and learning platform in which current and potential digital pioneers can engage in the co-design and co-development of digital innovation.

# Introduction

## About the project

# Visit DigiTrans Hub

## Step 1

Visit the URL: <https://digitranshub.eu/> and click the up-right button in the corner “Visit DigiTrans Hub”.

Visit the

Learning Corner

Network Hub

## Step 2

From this page you can choose which area you want to visit. The **Learning Corner** or the **Network Hub**.

# DigiTrans HUB

## Learning Corner

## Educational Resources

A variety of educational resources allows you to foster new digital, social and transformative competencies according to your specific needs. On an individual level, you may learn to understand complex challenges, network and share knowledge with other stakeholders, and develop new ideas as part of a collective. On a systemic level, you may learn to initiate and follow-through Smart Region strategies yourself. All resources are intended to be modular and reproducible. We encourage you to re-purpose our resources for your own workshops, events or lectures.

All educational resources are subdivided into three modules. Please feel free to explore our modules as you see fit. Just like there is no universal solution to a region's socio-economic challenges, there is no fits-for-all learning pathway that we recommend. Find your own way of becoming a digital pioneer!

### Step 3

There are 4 different free learning modules with educational materials, available in 5 languages and accessible from the website.

By clicking on the blue button in each module the user can access a short content description of each module.

By pressing the 'Start here!' button, the user can start each module, redirecting to the learning space.

# Step 4

The **User Dashboard** of the learning modules is really simple and it contains two main parts: 1) The sidebar with all the chapters and 2) the main learning space with the educational material.

The user can navigate through the sidebar or within the educational resources by using the given direction buttons.

The screenshot displays the 'Learning Materials' user dashboard. At the top, there are two legends: a purple square for 'Learning nugget' (Boxes with this color refer to a Learning nugget) and a red square for 'Collaborative tool' (Boxes with this color refer to a Collaborative tool). The sidebar on the left contains several items, each with a colored background: 'Systems Thinking - Learn to understand the complexity of your regional challenges' (purple), 'Rich Picture - A method to visualize complex regional ecosystems' (red), 'Smart Region Key Activities - Understanding key fields of action' (purple), 'Smart Region Key Vocabulary - Understanding key terms related to smart regions' (purple), 'Smart Region Key Competencies - Understanding key competencies of a digital pioneer' (purple), and 'Stakeholder A tool to visualize...' (red). The main content area features a large purple box with the title 'Systems Thinking - learn to understand the complexity of your regional challenges' and a 'BEGIN' button. To the right, there is a 'LEARNING NUGGET' section with an icon of an open book and text stating 'This learning nugget does not require participants to engage in interaction.' Below this is a 'COMPETENCIES TACKLED:' section with two items: 'Ability to understand the context you are working in' and 'Ability to anticipate and understand (complex) problems', each with a checkmark icon. At the bottom of the main content area, there is a line of text: 'By studying this learning nugget workshop participants will become acquainted with smart regional problems'.

**Systems Thinking - learn to understand the complexity of your regional challenges**

# DigiTrans Hub

## Collaborative Corner

### How does it work?

The DigiTrans Hub's Collaborative Corner connects digital pioneers across Europe.

Here, users can:

- **Join the Network:** Register to join a vibrant community of organizations and initiatives driving digital transformation.
- **Explore the Map:** Discover nearby initiatives and collaborators using the interactive map.
- **Search the Directory:** Filter members by sector or interests for targeted connections.
- **Build Connections:** Partner with like-minded professionals to share expertise and launch impactful projects.

This platform fosters collaboration, knowledge exchange, and meaningful connections in the digital ecosystem.

## Step 5

Before you fill in the form and join to DigiTrans Collaborative Corner, we recommend to join the LinkedIn Group page, and be a member of DigiTrans's digital community.

Join Our LinkedIn Group 

## Step 6

In this step, the user will be able to fill-in the form with details of the company/organisation that represents.

**Company / Organisation Name:**

**Company / Organisation Description:**

**Email:**

**Address:**

**Website:**

**Company / Organisation Sector:**

# Step 7

TBy answering a few questions, the user can indicate their areas of interest and what they are looking for in the Collaborative Corner.

**I'm Interested In:**

- Smart Environment (e.g. energy transition, decarbonisation, resource management)
- Smart Economy (e.g. co-working, industry 4.0, robotics)
- Smart Living (e.g. security, smart home technologies, community building)
- Smart Society (e.g. e-learning, community building, digital citizenship)
- Smart Mobility (e.g. automated transportation, logistics, shared mobility)
- Smart Government (e.g. digital services, inclusion, open data)

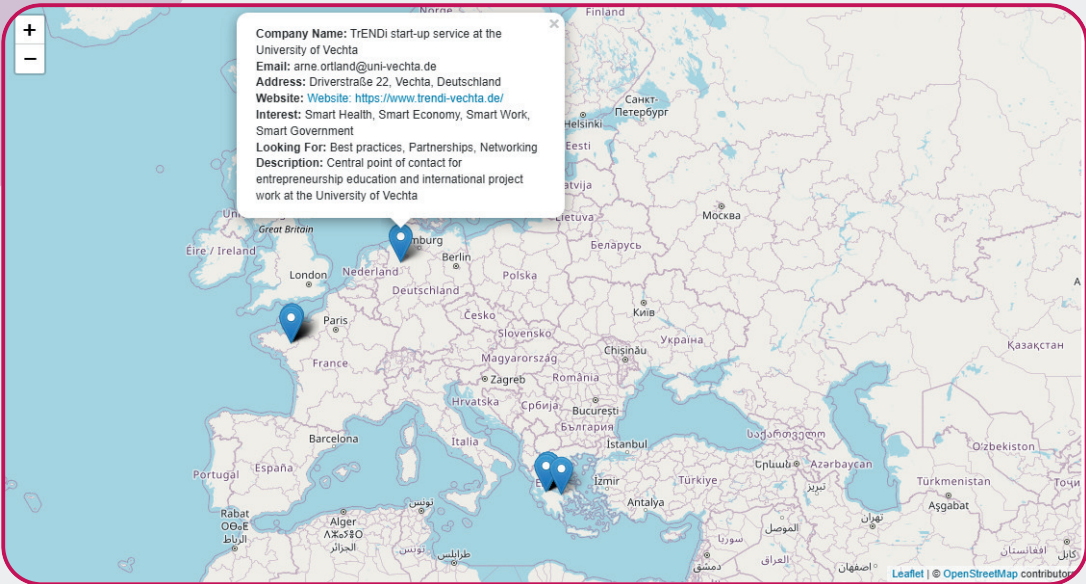

**What are you looking for in the DigiTrans Hub's Collaborative corner?**

- Best practices (learning from others)
- Partnerships for upcoming initiatives and projects
- Networking (connecting with other organizations)
- I give my consent for the storage and use of the submitted information on the DigiTrans Hub, based on the project's [Privacy Policy](#)

**Submit**

# Step 8

After submission, the admins check and approve the entry after which the user's information appear on the interactive map and in the contact database.

# Step 9

Next to the interactive map section there is a database in which the submitted information of each member of the hub is appearing.

A search function helps the user to easily find all the information that they are looking for.

In addition, the custom search can be used to filter the database based on different indicators such as location, sector, and area of interest.
